Dry Moly

Lubricant

DRY MOLY is a dry film lubricant containing molybdenum disulfide. Dries quickly with a minimal amount of material transference. Will not carbonize under extreme temperatures. DRY MOLY is deal for those lubricating jobs when a liquid lubricant cannot be used. Packed in convenient to use aerosol can.

Areas of Use:

- Foundries
- Automotive Plants
- Vehicle Maintenance
- Paper and Corrugated Converting
- Chemicals Plants
- Textile Plants
- Woodworking
- Marine
- Agricultural Equipment
- Military Equipment
- Road Equipment
- Aircraft Maintenance

Effective Against:

- Water
- Oil
- Alkalies

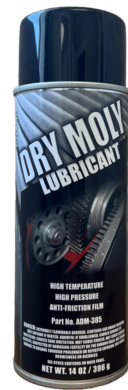

Directions for Use:

Shake can vigorously before application. Surface must be free from all loose rust, oil, grease and old paint. Spray with a sweeping motion, holding can 8 to 10 inches away from surface. Apply a thin uniform coating. Allow to set approximately 3 to 5 minutes before applying second coat.

Specifications:

Classification	Aerosol lubricant
Color	Dark grey to black
Odor	Characteristic solvent
Solubility in water	Not available
Flammability	Extremely Flammable spray
